## **The Default Mode Network and EEG Regional Spectral Power**

January 1st, 2017 - Our results also suggest that the DMN associates with different EEG bands as reported by Jann et al and supports the conclusion of Mantini et al according to which a functional network is characterized by a specific electrophysiological signature created by the combination of different brain rhythms

## **Functional connectivity and brain networks in schizophrenia**

January 1st, 2017 - Schizophrenia has often been conceived as a disorder of connectivity between components of large scale brain networks We tested this hypothesis by measuring aspects of both functional connectivity and functional network topology derived from resting state fMRI time series

acquired at 72 cerebral

December 10th, 2018 - Do you want to remove all your recent searches All recent searches will be deleted

### **Creativity and the default network A functional**

January 8th, 2019 - The results suggest that the ability to generate creative ideas is characterized by increased functional connectivity between the inferior prefrontal cortex and the default network pointing to a greater cooperation between brain regions associated with cognitive control and low level imaginative processes

### **PDF Functional Connectivity of EEG LORETA in Cortical**

January 7th, 2019 - Functional Connectivity of EEG LORETA in Cortical Core Components of the Self and the Default Network DNT of the Brain

### **Functional connectivity assessed by resting state EEG**

December 25th, 2018 - Thus exploring functional connectivity in the resting state rather than during performance of a specific task might elucidate an intrinsic functional disintegration of brain regions in AD patients To evaluate resting state synchronization in the functional networks various methods of connectivity assessment have been applied to EEG data

### **Default mode network functional and structural**

December 13th, 2018 - Disrupted functional connectivity within the motor network has been shown in one study Kasahara et al in press and acute abnormalities of default mode network functional connectivity after mild traumatic brain injury have recently been reported Mayer et al in press

### **FUNCTIONAL CONNECTIVITY OF PubMed Central PMC**

January 1st, 2017 - Increased EEG functional connectivity can correspond to decreased fMRI functional connectivity 7 Reduced functional connectivity between areas of the brain can be associated with increased connectivity elsewhere to compensate for the resulting functional disconnection 9 33 36 Overall patterns of altered connectivity imply abnormal brain networks and allow contemplation of potential

### **Functional Connectivity of EEG LORETA in Cortical Core**

January 2nd, 2019 - Cannon Rex Lee Functional Connectivity of EEG LORETA in Cortical Core Components of the Self and the Default Network DNT of the Brain PhD diss University of Tennessee 2009

### **Default mode network Wikipedia**

January 12th, 2019 - In neuroscience the default mode network DMN also default network or default state network is a large scale brain network of interacting brain regions known to have activity highly correlated with each other and distinct from other networks in the brain

### **Resting State Functional Connectivity Reflects Structural**

December 11th, 2018 - Functional connectivity reflects structural connectivity in the DMN a Task free functional connectivity in the DMN is

shown in a group of 6 subjects

### **PLOS ONE The Default Mode Network and EEG Regional**

February 4th, 2014 - Our results also suggest that the DMN associates with different EEG bands as reported by Jann et al and supports the conclusion of Mantini et al according to which a functional network is characterized by a specific electrophysiological signature created by the combination of different brain rhythms

### **Default Mode Network in Childhood Autism Posteromedial**

January 11th, 2019 - Background The default mode network DMN a brain system anchored in the posteromedial cortex has been identified as underconnected in adults with autism spectrum disorder ASD
